#### AGENDA ITEM COMMENTARY

**ITEM TITLE:** Consider, discuss, and possibly vote to approve, amend, revise or deny Ordinance 2022-07-01 related to Outdoor Lighting establishing permitted use of outdoor lights, lighting zones, and street lighting; and Declaring an Emergency, or take any other appropriate action.

**INITIATOR:** Greg Buckley, Town Administrator,

**STAFF INFORMATION SOURCE:** Greg Buckley, Town Administrator

**BACKGROUND**: At the February Board of Trustees meeting the Trustees authorized Freese and Nichols to develop a Street Light Ordinance and Policy based on the Dark Sky principles. At this point Freese and Nichols would like to make a presentation and review some of the assumptions used in developing the Ordinance/Policy. The review includes helping the Board and Community understand some of the differences between lighting styles, types, illumination, etc.

On December 11, 2021 at a Special Board of Trustee meeting Freese and Nichols held a street light demonstration. The demonstration provided a visual understanding of two light spectrums, 4000K and 3000K, at the same light level. The demonstration also highlighted the benefits of having an outdoor lighting ordinance which sets the levels of light within certain areas or zones.

At the December 18, 2021 Board of Trustees meeting the Board reviewed and discussed the Street Light Ordinance. The Board and comments from the residents provided the need for further refinement and clarification on some areas of the Ordinance. The Staff and Freese and Nichols have continued to work to address the issues discussed during the meeting. Manly clarified language related to residential outdoor lighting and exemptions, further develop language for Mater Lighting Plan, and establishing warrant guidelines for determining need for a streetlight.

The proposed Outdoor Lighting Ordinance continues to follow "Dark Sky" policy which is a model of restrictive lighting to help minimize light pollution and ambient glare. Carlton Landing currently has minimum light glare which allows for viewing of the night sky and stars. Our desire is to maintain minimal light glare from outdoor light sources and uses as the Town continues to grow and develop. The Ordinance creates multiple lighting zones, which sets the allowed light intensity within each zone. Zone 0 allows no ambient lighting while Zone 4 allows high ambient lighting. Residential areas have been set to Zone 1 or low ambient lighting.

**FUNDING:** None

**EXHIBITS:** Outdoor Lighting Ordinance

**RECOMMENDED ACTION:** Approve Ordinance 2022-07-01 related to Outdoor Lighting establishing permitted use of outdoor lights, lighting zones, and street lighting.

#### I. OUTDOOR LIGHTING

#### A. Purpose

The purpose of this Ordinance is to provide regulations for outdoor lighting that will:

- 1. Permit the use of outdoor lighting that does not exceed the minimum levels specified in IES (Illuminating Engineering Society) recommended practices for night-time safety, utility, security, productivity, enjoyment, and commerce.
- 2. Minimize adverse offsite impacts of lighting such as light trespass, and obtrusive light.
- 3. Curtail light pollution, reduce skyglow and improve the nighttime environment for astronomy.
- 4. Help protect the natural environment from the adverse effects of night lighting from gas or electric sources.
- 5. Conserve energy and resources to the greatest extent possible.

#### II. LIGHTING ZONES

Lighting zones shall be assigned to all properties within the jurisdiction in relationship to adopted transect (or zoning) districts and in accordance with Table II-A below.

#### A. LZ-0: No ambient lighting

Areas where the natural environment will be seriously and adversely affected by lighting. Impacts include disturbing the biological cycles of flora and fauna and/or detracting from human enjoyment and appreciation of the natural environment. Human activity is subordinate in importance to nature. The vision of human residents and users is adapted to the darkness, and they expect to see little or no lighting. When not needed, lighting should be extinguished.

#### B. LZ-1: Low ambient lighting

Areas where lighting might adversely affect flora and fauna or disturb the character of the area. The vision of human residents and users is adapted to low light levels. Lighting may be used for safety and convenience, but it is not necessarily uniform or continuous. After curfew, most lighting should be extinguished or reduced as activity levels decline.

#### C. LZ-2: Moderate ambient lighting

Areas of human activity where the vision of human residents and users is adapted to moderate light levels. Lighting may typically be used for safety and convenience, but it is not necessarily uniform or continuous. After curfew, lighting may be extinguished or reduced as activity levels decline.

#### **D.** LZ-3: Moderately high ambient lighting

Areas of human activity where the vision of human residents and users is adapted to moderately high light levels. Lighting is generally desired for safety, security and/or convenience and it is often uniform and/or continuous. After curfew, lighting may be extinguished or reduced in most areas as activity levels decline.

#### E. LZ-4: High ambient lighting

Areas of human activity where the vision of human residents and users is adapted to high light levels. Lighting is generally considered necessary for safety, security and/or convenience and it is mostly uniform and/or continuous. After curfew, lighting may be extinguished or reduced in some areas as activity levels decline.

#### III. GENERAL REQUIREMENTS FOR ALL OUTDOOR LIGHTING

#### A. Conformance with All Applicable Codes

All outdoor lighting shall be installed in conformance with the provisions of this Ordinance, applicable Electrical and Energy Codes, and applicable sections of the Building Code.

#### B. Applicability

Except as described below, all outdoor lighting installed after the date of effect of
this Ordinance shall comply with these requirements. This includes, but is not
limited to, new lighting, replacement lighting, or any other lighting whether
attached to structures, poles, the earth, or any other location, including lighting
installed by any third party.

#### 2. Exemptions

- a. Lighting within the public right-of-way or easement for the principal purpose of illuminating roads and highways. No exemption shall apply to any street lighting and to any lighting within the public right of way or easement when the purpose of the luminaire is to illuminate areas outside of the public right of way or easement.
- b. Lighting for public monuments and statuary.
- c. Lighting solely for signs (lighting for signs is regulated by the Sign Ordinance).
- d. Repairs to existing luminaires not exceeding 25% of total installed luminaires.
- e. Temporary lighting for theatrical, television, performance areas and construction sites;
- f. Underwater lighting in swimming pools and other water features

- g. Temporary lighting and seasonal lighting provided that individual lamps are less than 10 watts and 70 lumens.
- h. Lighting that is only used under emergency conditions.

#### 3. Preemption

All lighting shall follow the provisions of this ordinance, except lighting required by federal, state, territorial, commonwealth or provincial laws or regulations.

#### **C.** Allowed Correlated Color Temperature

The allowable correlated color temperature of all lighting fixtures shall not exceed 3,000 Kelvins (K).

#### D. Lighting Control Requirements

1. Automatic Switching Requirements

Controls shall be provided that automatically extinguish all outdoor lighting when sufficient daylight is available using a control device or system such as a photoelectric switch, astronomic time switch or equivalent functions from a programmable lighting controller, building automation system or lighting energy management system, all with battery or similar backup power or device.

#### 2. Exceptions

Automatic lighting controls are not required for the following:

- a. Lighting under canopies.
- Lighting for tunnels, parking garages, garage entrances, and similar conditions
  where a light source is almost completely concealed or serves a very specific
  purpose.
- 3. Automatic Lighting Reduction Requirements

Total outdoor lighting lumens for businesses shall be reduced by at least 30% or extinguished from one (1) hour after closing until one (1) hour before opening. This reduction does not apply to a business that operates on a 24-hours per day basis.

#### 4. Exceptions

Lighting reductions are not required for any of the following:

- (i) With the exception of landscape lighting, lighting for residential properties including multiple residential properties not having common areas.
- (ii) When the outdoor lighting consists of only one luminaire.
- (iii) Code required lighting for steps, stairs, walkways, and building entrances.
- (iv) When in the opinion of the Authority, lighting levels must be maintained.
- (v) Motion activated lighting.

#### IV. METHODS FOR DETERMINING COMPLIANCE

Two methods are provided for assessing regulatory compliance:

#### A. Prescriptive Method

1. The Prescriptive Method contains precise and easily verifiable requirements for luminaire light output and fixture design that limit glare, upward projected light (uplight), light trespass, and the amount of light that can be used.

- 2. The Prescriptive Method constrains total installed initial luminaire lumens based on compliant luminaires and project property conditions and features.
- 3. The Prescriptive Method is most suitable for outdoor lighting projects that do not involve a lighting professional because it is simple and does not require engineering expertise.

#### B. Performance Method

- 1. The Performance Method allows greater flexibility and creativity in meeting the intent of this Section.
- 2. The Performance Method establishes system performance metrics for the system detailing photometric calculations in addition to individual luminaire compliance.
- 3. An engineer or lighting professional generally will be required to design within the Performance Method.
- 4. The Performance Method is most suitable for projects with the following characteristics:
  - a. Lighting must be evaluated under complex requirements not suitable under the Prescriptive Method;
  - b. The applicant wants or needs more flexibility in lighting design;
  - c. The lighting designer plans to aim or direct any light fixture upward (above 90 degrees); or
  - d. The project requires higher lighting levels compared to typical area lighting.

#### V. REQUIREMENTS FOR NON-RESIDENTIAL AND MIXED-USE OUTDOOR LIGHTING

#### A. General Requirements

For all Live-Work, Bungalow Court, Rowhouse, Courtyard Building, and Flex Building/Six-Plex properties, all outdoor lighting shall comply either with the Prescriptive Method or the Performance Method described in this section.

#### B. Prescriptive Method

An outdoor lighting installation complies with this section if it meets the requirements of subsections 1 and 2, below.

#### 1. Total Site Lumen Limit

- a. The total installed initial luminaire lumens of all outdoor lighting shall not exceed the total site lumen limit. The total site lumen limit shall be determined using either the Parking Space Method (Table IX-A) or the Hardscape Area Method (Table IX-B).
- b. Only one method shall be used per permit application, and for sites with existing lighting, existing lighting shall be included in the calculation of total installed lumens
- c. The total installed initial luminaire lumens is calculated as the sum of the initial luminaire lumens for all luminaires.

#### 2. Limits to Off Site Impacts

All luminaires shall be rated and installed according to Table IX-C.

- a. Light Shielding for Parking Lot Illumination
  - (i) All parking lot lighting shall have no light emitted above 90 degrees.
  - (ii) Exception

Ornamental parking lighting shall be permitted by special permit only and shall meet the requirements of Table IX-C for Backlight, Uplight, and Glare, without the need for external field-added modifications.

#### C. Performance Method

- 1. Total Site Lumen Limit
  - a. The total installed initial luminaire lumens of all lighting systems on the site shall not exceed the allowed total initial site lumens. The allowed total initial site lumens shall be determined using Table IX-D and Table IX-E. For sites with existing lighting, existing lighting shall be included in the calculation of total installed lumens.
  - b. The total installed initial luminaire lumens of all are calculated as the sum of the initial luminaire lumens for all luminaires.
- 2. Limits to Off Site Impacts
  - All luminaires shall be rated and installed using either Option IV.A\_Prescriptive Method or Option IV.B\_Performance Method. Only one option may be used per permit application.
    - (i) Option A: All luminaires shall be rated and installed according to Table IX-C.
    - (ii) Option B: The entire outdoor lighting design shall be analyzed using industry standard lighting software including inter-reflections in the following manner:
      - (a) Input data shall describe the lighting system including luminaire locations, mounting heights, aiming directions, and employing photometric data tested in accordance with IES guidelines. Buildings or other physical objects on the site within three object heights of the lot line must be included in the calculations.
      - (b) Analysis shall utilize an enclosure comprised of calculation planes with zero reflectance values around the perimeter of the site. The top of the enclosure shall be no less than 33 feet (10 meters) above the tallest luminaire. Calculations shall include total lumens upon the inside surfaces of the box top and vertical sides and maximum vertical illuminance (footcandles and/or lux) on the sides of the enclosure.
      - (c) The design complies if:
        - (i) The total lumens on the inside surfaces of the virtual enclosure are less than 15% of the total site lumen limit; and
        - (ii) The maximum vertical illuminance on any vertical surface is less than the allowed maximum illuminance per Table IX-F.

#### VI. REQUIREMENTS FOR RESIDENTIAL OUTDOOR LIGHTING

#### A. General Requirements

For permitted residential uses, all outdoor luminaires shall be fully shielded and shall not exceed the allowed lumen output in Table IX-G, row 2.

#### B. Exceptions

- 1. One partly shielded or unshielded luminaire at the main entry, not exceeding the allowed lumen output in Table IX-G, row 1.
- 2. Any other partly shielded or unshielded luminaires not exceeding the allowed lumen output in Table IX-G, row 3.
- 3. Low voltage landscape lighting aimed away from adjacent properties and not exceeding the allowed lumen output in Table IX-G, row 4.
- 4. Shielded directional flood lighting aimed so that direct glare is not visible from adjacent properties and not exceeding the allowed lumen output in Table IX-G, row 5.
- 5. Open flame gas lamps.
- 6. Lighting installed with a vacancy sensor, where the sensor extinguishes the lights no more than 15 minutes after the area is vacated.
- 7. Lighting exempt per Section III.B.2.

#### C. Requirements for Residential Landscape Lighting

- 1. Shall comply with Table IX-G.
- 2. Shall not be aimed onto adjacent properties.

#### VII. LIGHTING BY SPECIAL PERMIT ONLY

#### A. Special Lighting Permit Required

Lighting that serves the following types of uses and sites shall obtain a permit in accordance with B. Special Lighting Permit below:

- 1. Any use located within the Town's defined Lease Premise;
- Complex sites with unique lighting needs not otherwise addressed in Section V.
   Requirements for Non-Residential and Mixed-Use Outdoor Lighting or Section VI.
   Requirements for Residential Outdoor Lighting;
- 3. Residential lighting applications that require a Special Lighting Permit as indicated in Section IX.G.

#### **B.** Special Lighting Permit Process

Upon special permit issued by the Authority, lighting not complying with the technical requirements of this ordinance but consistent with its intent may be installed for complex sites or uses or special uses. Special Lighting Permit Application and Criteria:

- 1. Applicants shall demonstrate that the proposed lighting installation:
  - a. Has sustained every reasonable effort to mitigate the effects of light on the environment and surrounding properties, supported by a signed statement

- describing the mitigation measures. Such statement shall be accompanied by the calculations required for the Performance Method.
- b. Employs lighting controls to reduce lighting at a Project Specific Curfew ("Curfew") time to be established in the Permit.
- c. Complies with the Performance Method after Curfew.

#### 2. Approval Process

- a. The Authority shall review each such application.
- b. A permit may be granted if, upon review, the Authority believes that the proposed lighting will not create unwarranted glare, sky glow, or light trespass.

#### VIII. EXISTING LIGHTING

Lighting installed prior to the effective date of this ordinance shall comply with the following.

#### A. New Uses or Structures, or Change of Use

Whenever there is a new use of a property (e.g., zoning change or variance) or the use on the property is otherwise changed requiring a permit, certificate of occupancy, or administrative approval, all outdoor lighting on the property shall be brought into compliance with this Ordinance before the new or changed use commences.

- 1. Additions or Alterations
  - a. Major Additions.
    - If a major addition occurs on a property, lighting for the entire property shall comply with the requirements of this Code. For purposes of this section, the following are considered to be major additions:
    - (i) Additions of 25 percent or more in terms of additional dwelling units, gross floor area, seating capacity, or parking spaces, either with a single addition or with cumulative additions after the effective date of this Ordinance.
    - (ii) Single or cumulative additions, modification, or replacement of 25 percent or more of installed outdoor lighting luminaires existing as of the effective date of this Ordinance.
  - b. Minor Modifications, Additions, or New Lighting Fixtures for Non-residential and Multiple Dwellings
    - (i) For non-residential and multiple dwellings, all additions, modifications, or replacement of more than 25 percent of outdoor lighting fixtures existing as of the effective date of this Ordinance shall require the submission of a complete inventory and site plan detailing all existing and any proposed new outdoor lighting.
    - (ii) Any new lighting shall meet the requirements of this Ordinance.
  - c. Resumption of Use after Abandonment
    - (i) If a property with non-conforming lighting is abandoned for a period of six months or more, then all outdoor lighting shall be brought into compliance with this Ordinance before any further use of the property occurs.

#### IX. LIGHTING DESIGN STANDARDS AND METRICS

A. Allowed Total Initial Luminaire Lumens per Site, per Parking Space Method

This method applies only to properties with up to 10 parking spaces (including handicapped accessible spaces).

For lot lines that abut public roadways and public transit corridors, the lot line may be considered to be the centerline of the public roadway or public transit corridor for the purpose of determining compliance with this section. NOTE: This adjustment is relative to Table IX-C, Sections 1 and 3 only and shall not be used to increase the lighting area of the site.
- 2. To be considered 'ideally oriented', the luminaire must be mounted with the backlight portion of the light output oriented perpendicular and towards the lot line of concern.

# AGENDA ITEM COMMENTARY

**ITEM TITLE:** Consider, discuss, and possibly vote to amend, revise, approve or deny placement and installation of a streetlight, or take any other appropriate action.

**INITIATOR:** Greg Buckley, Town Administrator

**STAFF INFORMATION SOURCE:** Greg Buckley, Town Administrator

**BACKGROUND**: At the May 21, 2022, Board meeting the Board approved the streetlight fixture as the standard for streetlights within Carlton Landing. Staff, Project Manager and Freese and Nichols have discussed possible locations for the installation of the streetlight. Consideration has been made related to accessibility to electric service, visibility, and possible need. You may recall the installation of a streetlight is a requirement within the GO Bond, Series 2020.

The following locations have been identified as possible location for the streetlight.

Water Street and Park Street – on the east side of Water Street

Water Street south of Water Street Pavilion

Water Street and the walkway to Marina – either on the east or west side of Water Street depending on electric access

Ridgeline and Lower Green Way – on the northeast corner

Any of these locations meet the general purposes for installation of a streetlight. One location does not specifically stand out as a best choice compared to the others. The recent changes around Water Street and Park Street have changed the previous lighting limitations with the addition of ambient lighting, however; those still do not provide all night lighting.

**FUNDING:** GO Bond, Series 2020

**EXHIBITS:** Location Pictures

**RECOMMENDED ACTION:** Approve placement and installation of a streetlight.
